- **Languages**: C# (expert), C++, SQL, TypeScript, JavaScript
- **Engines**: Unity, Unreal, Cocos Creator, PixiJs
- **Competencies**: Multiplayer, OOP/SOLID, Design Patterns, Dependency Injection, Reactive programming, CI/CD, ECS
- **Tools**: Git, Docker, Jenkins, Android Studio, PlayFab, Google Cloud

Professional Experience

Made On Earth Games (Everbright) — Senior Developer | Oct 2024 – Present

4X Strategy RPG | Platform: Web, Mobile | everbright

- Architected a robust Hot Update System for mobile platforms, reducing patch deployment times and enabling live-ops content delivery without app store resubmission.
- Technical planning and code reviews for a distributed team of 20+ remote members, establishing coding standards and workflow pipelines.
- Engineered core Multiplayer Server logic and Client Gameplay systems, ensuring synchronization stability for concurrent users.
- Executed critical User Database Migrations and developed internal tools to accelerate Game Design iteration workflows.

Strange Loop Games (ECO) — Senior Developer | Sep 2020 – Sep 2024

Voxel Society Simulation | Platform: PC (Steam) | play.eco

- Developed complex Physics Simulations for land and water vehicles within a voxel-based multiplayer environment for Steam.
- Optimized Multiplayer Synchronization and deterministic gameplay systems for the open-world, collaborating with a team of 40+ developers.
- Engineered Data-Driven UI Systems, including a comprehensive Localization framework and interactive Tutorials, improving player onboarding and retention.

MainLeaf (BeachHead 2020) — Senior Developer (Contract) | Dec 2019 – Aug 2020

VR Action Shooter | Platform: PC/VR (Steam) | beachhead.com, steam

- Refactored core legacy systems and optimized rendering pipelines for a VR Multiplayer Shooter, achieving stable frame rates required for VR comfort.
- Collaborated directly with clients to plan roadmap features and technical requirements for the 2020 franchise reboot.

Monomyto (Gunstars) — Senior Developer (Contract) | Jul 2019 – Dec 2019
Battle Royale Shooter | Platform**:** Mobile (iOS/Android) | video

- Spearheaded the development of a mobile Multiplayer Shooter, successfully shipping on iOS and Android.
- Designed the project architecture and managed Cloud Integration, ensuring scalable backend performance for live matchmaking.

Vox Studio (Kaze and the Wild Masks, Alphabeta) — Unity Dev (Contract) | Aug 2018 – Jul 2019
2D Platformer | Platform**:** PC & Console (Switch/PS4/Xbox) | kazegame.com

- Executed Nintendo Switch Port for Kaze and the Wild Masks, handling memory optimization, input mapping, and performance profiling.

Investment game | Platform: PC, Mobile (iOS, Android) | alphabeta.io

- Development, release, creation of tools, support and documentation of a financial market game.

Cupcake Entertainment (Letters Blast) — Fullstack Game Dev (Contract) | Mar 2018 – Aug 2018
Social Puzzle Game | Platform**:** Web & Mobile | Video

- Maintained the full stack (Frontend, Backend, Database) for high-traffic social online game.

2Mundos Inc — Frontend Dev (Contract) | Jun 2017 – Jan 2018
Mini-Games | Platform: PC, Web, Mobile | Video

- Developed gameplay, structured, UI, integrated SDKs, creating 5 typing games inside a MMO for a learning game.

Electrical Engineering Game | Platform: Mobile | Video

- Developed simulation, gameplay, UI and editor customization. Delivered a finished product by refactoring the legacy code base and implementing critical updates.

Advergame | Platform: PC, Web, Mobile | Video 1, Video 2

- Developed procedural level generation, gameplay, particle effects, and simulation systems for 2 advergames for Pepsi from KeroCoco company.

Various Studios and Scholarships — Junior Dev | 2016 – 2017

- Worked on multiple small studios projects and scholarships with Unity3D, focusing on mobile and C# development.

Education

Bachelor's in Game Design — Uniritter Laureate International University, Porto Alegre, Brazil (2017)
